Professional Summary: Experienced in enterprise databases, proficient in AWS services, adept at deriving insights from complex datasets using Agentic AI based PowerBI dashboards, developing data-driven solutions, and skilled in Python programming.

Work Experience

EXL Service

Consultant / Assistant Manager | Gurugram, India | Jul 2025 - Present

- Developed **PowerBI** dashboards for Workers Compensation and Medical Care claims analytics, delivering insights on loss-ratios, claim frequency & severity, medical cost per claim, & claim inventory lifecycle metrics.
- Implemented automated reporting pipelines using **Power Automate** with threshold based **triggers**, sequential **dataflow** orchestration, and exception handling which ultimately reduced manual efforts by 80%.
- Designed **SAS Viya** data flows for scalable claims data processing through multi stage **PROC SQL transformations**, enterprise data warehouse integration, and automated export to access controlled network drive locations.
- Developed an **LLM** based theme extraction pipeline to convert unstructured audit flagged FNOL call transcripts into categorized, analyzable datasets - identifying agent error patterns, mistake recurrence, & thematic trend accross caller - agent interactions.
- Implemented an **Agentic AI-powered Power BI development workflow** by integrating **LLM** based agents (**Claude, Copilot, etc.**) within **VS Code** using the **PBIP** format, enabling natural-language dashboard generation, real time modification, and querying, while accelerating dashboard delivery by 60–70%.

MobiKwik

Data Analyst | Gurugram, India | Sep 2024 - Jul 2025

- Led automation of merchant reports (online, offline, GT) using Airflow, providing insights on GMV, transaction count, and amounts, reducing manual reporting time by 100%.
- Optimized advanced query performance by 30% through CTEs, temporary tables, and join reduction, resulting in faster report generation and efficient server storage.
- Automated data storage and reporting on Linux servers, using EC2 for MongoDB collections, ensuring secure, scalable data management.
- Built PowerBI and QuickSight dashboards for marketplace (multi-store) and non-marketplace (single-store) merchants, streamlining data visualization and analysis for GMV and sales.

QualityKiosk Technologies Pvt. Ltd.

Software Engineer | Mumbai, India | Aug 2023 - Aug 2024

- |Developed KPI Dashboard for employee records and performance monitoring, enhancing management review capabilities using PowerBI with live data connection to Excel and MariaDB.
- Created interactive Recruitment Dashboard to track metrics, trends, and categorize joiners by skills/demographics, improving recruitment insights via SharePoint live data connection.
- Implemented AI-driven root cause analysis for predicting defect counts in future project phases based on predictive analytics.

Accenture

Associate Software Engineer

Gurugram, India | June 2021 - May 2023

- Conducted comprehensive data analysis on large datasets, utilizing **ETL** processes to extract, identify patterns, trends, and insights that contributed to improved business strategies.
- Developed and maintained **SQL** queries and scripts to extract, transform, and load data from various sources into the database for analysis.
- Created visually appealing dashboards and reports using **PowerBI**, **PowerApps** presenting data-driven insights to stakeholders.
- Implemented Machine Learning models using **Scikit-learn** for predictive analytics.

Technical Skills

- **Programming languages:** Python
- **Databases:** MySQL, MongoDB, SQL Server, DBeaver, Strataware, Medi-Analytics, Verisk
- **Open Source Tool :** Apache Airflow, Redash, Jira, VS Code
- **MS Office:** Advanced Excel, PowerPoint
- **Cloud Environment:** AWS S3, Athena, EC2
- **Machine Learning Frameworks:** TensorFlow, PyTorch, Scikit-learn
- **Dashboarding Tools:** PowerBI
- **Workflows:** Power Automate, SAS Viya

Projects

Supply Chain Analytics Dashboard

- Build a dashboard that tracks and analyzes supply chain metrics such as inventory levels, order fulfillment, and supplier performance.
- Visualize data on dashboards using visuals like stacked bar charts, maps, and tables. Monitor key performance indicators (KPIs) to identify bottlenecks or areas for improvement.

Splunk Reload Service Simulator

- Worked on Splunk Reload Service Simulator model consisting of a dataset which indicates overall performance of a model using various parameters like User Experience, Transaction, Infra, DB, Revenue & Availability to calculate Severity indicating efficiency of our model using **Python** and **Flask** framework.

Education

Bachelor of Engineering (ECE)

Birla Institute of Technology, Mesra

July 2017 - May 2021

GPA: 6.93

Class 12th, CBSE - 2017

Blue Heaven, Jaipur, Rajasthan

Percentage: 74.5

Class 10th, CBSE - 2015

St. Edmunds School, Jaipur, Rajasthan

Percentage: 70.3
